

# Bioconversion Fertilizer

## General Description

Bioconversion Fertilizer is an organic fertilizer produced from the Black Soldier Fly larvae bioconversion process, also including frass and exoskeleton sheds. It has dry fine particles, with a good blend of nitrogen (N), phosphorus (P) and potassium (K) as well as minerals.

## Application

Mix with soil with 2:3 ratio. Suitable for soil conditioner, as well as crops, vegetable, fruit, and decorative plants fertilizer. 100% natural, no chemicals added.

## Benefits:

- Contains a lot of good microorganisms
- Contain bio-stimulant properties
- Increase the plant nutrients absorption
- Increase yields and health of vegetables and fruit trees
- Improve the overall soil microflora
- Contains the chitin, who good for stimulates plants to grow stronger cell walls and reinforce their structure.

## Shipping & Handling

Bioconversion Fertilizer is available in 5 kg and 20 kg packaging size. Ready to be shipped across the world. Other packaging is available based on demand. Keep in dry place, in closed containers & no direct sunlight.

### Nutritional Content

Nitrogen (N).....	2.37%
Phosphorus (P).....	5.46%
Potassium (K).....	1.13%
Moisture.....	30.65%
Organic Carbon.....	44.95%
C/N ratio.....	18.97
pH.....	7.74
Fe total.....	1443 ppm
Cu.....	4.95 ppm
Zn.....	29.39 ppm
Mn.....	94.20 ppm
